## **LUNGS - COVID - ROSS RIVER VIRUS -**

Just like to tell you about another success with the Low Voltage Machine. For about 6 months I had slowly worsening issues with my lungs until it got to the point where about 4 times a day I would find it impossible to suck in enough air to barely stay conscious and needed to sit down to avoid passing out.

I had seen a few GPs who I must say were worse than useless, did a few tests but came up with nothing.

When my machine arrived I tried a few of the pre-settings the machine offered. On about the 3rd attempt I tried setting for Group 10 and after just 4 days my lungs were totally fixed, another great success from Low Voltage Machine.

On another great note my ex wife was talking to her friend's new partner and mentioned it was probably only the Low Voltage Machine that kept her alive, and to her amazement he said, "Yes they are brilliant, it totally smashed my Ross River Virus".

The good news keeps on coming.

Lucky the new machine came with presets, I had never heard of Gram + or Gram - so would never have thought to try that setting. That same setting is doing great things for my house mate.

Thanks again

Regards Steve

Western Australia

So great to breathe easy again, I was beginning to get very worried.

## **COVID-19**

Thank you, these frequencies you emailed me are the same frequencies I previously found on the internet, they were not directly attributed to you, and I could not find them in your latest frequency list manual that I was aware of, which is why I wanted make sure you were aware of them... the wuhan or 19 n-coV virus frequency set in your listing that you emailed to me is what I found before and

attribute to saving me. I found them at the worst time that I had in being able to breath, or more precisely, becoming unable to breath. To begin with, I am a 54 y/o male in relatively good health, my symptoms were mild, only really noticeable was the unshakable dry unproductive cough with slow progression of lung congestion. I had no noticeable fever or sore throat and only noticed a redness in my throat about a day before I was in acute trouble with my breathing, but again, not really a sore throat... I really thought it was a normal cold or the beginning of allergy season... up until I became aware that I was in acute trouble breathing and this wasn't going to be letting up. Using the Wuhan or 19 N-coV frequency set, did one very important thing for me, it made the congestion in my lungs go from a thick uncoughable problem to making it a thin but coughable liquid. Having the ability to cough the congestion out isn't painless, but it does make things manageable compared being unable to clear it out and/or breath. I am not sure if this is actually helping to handle "the 19 N-coV" part, but being able to breath clearly enough on my own is enough, and allowing me to carry on as is. Breathing is a good thing!

I tried to get tested at the point I realized I had bronchitis. I have had bronchitis and pneumonia enough times in my past to realize when I am "there", and also that I am quite prone to respiratory problems. But because I didn't have a doctor's release, or pass the screening process, which was only geared at people in acute trouble breathing, which I was not at that point... they sent me away without testing me, only apologizing that there was only a limited number of test kits available, and they were saving those for people in obvious acute need. So I have no clinical diagnosed proof of actual infection, even though I know that I have never been hit this hard and fast with any other type of respiratory illness ever, and have no doubt in my own mind what I have/had was this corona virus.

As far as I am concerned, my Low Voltage Machine machine saved my life a few days ago... because as we all know, and are made painfully aware of from the daily news reports, there is nothing available in all the medical systems of the world to fight this corona

virus, and nobody knows when there will be. The only and last measure they do have is a respirator... if there is one available.

## **FLU VIRUS**

Hello, just wanted to let you know we love the pro V2 Low Voltage Machine machine !

It works, knocked out the flu virus on 3 of my family used the (influenza general)

Group, thanks.

I noticed on myself...using the back pain group that the other results like scar-tissue disappearing from old injuries.

My 5 yr. Old grand son got notisably better just from being in the room while treating his mother (my daughter) for the flu. Like he was'nt getting better from medication at all, but after the Low Voltage Machine he was back to normal.

I believe this is close to the fountain of youth, R S

## **BREAST CANCER**

I am very excited! I am a breast cancer survivor, however it came back. I decided to buy your Low Voltage Machine which I have used for about a year. Went to my doctor and had a Pet scan the results showed no cancer in my body. The dr wants me to continue on Ibrance. That's all he knows. My question to you is how often would you suggest that I continue using the professional Low Voltage Machine machine? It has really been a blessing. I just don't believe I would be cancer free without it. My doctor really seemed surprised at my results. Thank you guys, may God continue to bless you!

## **CONSTANT ITCHINESS - SKIN INFECTION**

Since I received the replacement Low Voltage Machine professional zapper, the healing and reduction of skin infection with Morgellons has decreased and I feel normal and not distracted by constant itchiness.

Using a mat and feet attachments together the elimination of parasites is much faster. Also it is important not to eat carbs, milk

products or fruits as this is the main food resource for parasites.  
M.V.=

## **SORE FOOT - OSTEOARTHRITIS**

Hi Michele received my machine in September 2017 to treat my Lymphoma which I have just finished 6 monthly bouts of chemo - not nice but effective for now- doctor said the cancer is treatable not curable. Decided to leave the Low Voltage Machine treatment for this lymphoma and concentrate on a chronic sore foot that my doctor diagnosed as Osteoarthritis, let me tell you the results are outstanding I am back walking and some running as I have been a runner all my life, also a knuckle injury in my right hand that ended my boxing for fitness days some 5 years ago is actually getting better.

Will be turning on Lymphoplasmacytic Lymphoma Christmas Day which I decided to back in September, will do a blood test in February and week later a video linkup with the specialist down in Perth, we will see what happens then.

## **SCHIZOPHRENIA**

Hello, i'm experiencing result with resolving my schizophrenia, initially everything got worse, the voices more persistent, for 2 weeks and then within a month i noticed i was significantly calmer less agitated, i also notice the volume on my voices as less by 50% or 70%, i mean my voices were really loud before, louder than a tv on full volume, i had it bad indeed, but now it's whispering :) and i hardly get voices anymore, i can trigger it easily though, i imagine i'll be able to trigger (voices) until it totally fades out to nothing.

i'm really grateful of ur help....

it's only 1 month 15 days in now, so i'm seeing good results, btw, i'm using it some hours of the day and all night!!!!

i just might notify you later if it totally works, i wonder if i'll hear sound in my head again like i used too or is that psychosis also lol.

2011 i had intrusive thoughts racing fast multiple thoughts at once, then 2012 my mind went silent for one year

, i had trouble comprehending with my mind then, 2012 october, i hear loud voices at a distance!

so it might be interesting for you to hear the end result, if the sound goes back side my head and i think normally again :) S.R.

## **DIGESTIVE ISSUES - GAS**

I noticed that there is nothing in the blog about gas, bowels, intestinal discomfort, so I thought I would share my experience. I started eating some fiber/starchy foods that I apparently couldn't digest, and started experiencing gas, looser bowels, and a sense that I was not digesting well. I used the bacterial infections gram+ set. I could feel it working on the first day, and the gas is almost gone, after 2 weeks. I know that eating sugar also affects me, and I have used both the detox organs and detox metal sets for better intestinal comfort. I repeat these set every so often.

My husband had gas and explosive bowl movements and we used the bacterial infections and mycoses set. After one night his bowel movements were not explosive and he was better after 10 days of overnight use.

My experience is that the right frequency set will "feel like it is working" so if one of the above sets doesn't seem to work, then try another.

I also know that eating foods that aren't right for me alters the progress of the frequency treatment. I would also say that we have experienced improvement with almost everything that we have tried. P.C.

## **BACK PROBLEMS**

Several years ago, my younger daughter injured her back while pregnant with twin boys. Several days ago she entered the hospital with severe sciatica involving excruciating pain in her lower back and complete numbness of her right leg and foot. She was treated with pain medication and steroid injections. The doctors advised her to learn to live with the chronic pain.

After returning home, the steroid effect wore off and her pain returned worse than before - 9 on a scale of 1-10.

Two days ago, I urged her to use the Low Voltage Machine machine I had sent her for another problem. As of yesterday, 24 hours after

starting the Low Voltage Machine machine treatment, her pain declined from 8 to 4.

She can sit again, and lie down without pain. The feeling is returning to her leg and foot.

My older daughter had the same problem from carrying twin girls. She was incapacitated with back pain several years ago. The Low Voltage Machine machine eliminated her back pain, as it did for several friends who had been experiencing chronic back and neck pain.

## **RECTAL CANCER -HPV**

E.T., was working on Ano rectal cancer on join and HPV:

Results show it's completely gone.. They're amazed!! Scan in 3 months to make sure. They will monitor me for next few years. I'm going to keep on with all Protocols and will still do the cleanses and be in touch with how I'm progressing.

Big hug and love for all your support these last weeks has been so amazing. Really appreciate it. If you ever need help this end let me know!!!

## **AUTISM**

This is from someone we are working with who is doing an autism study. He has published results and keeps us up to date as to the progress. This little bit was just sent to me - it was included in an email, not really a report, just a mention:

As more monthly reports come in [every month], the improvements simply continue. Our 33 year old who has been autistic since age 8 has now reversed 17 of his 19 attributes [as of this month] which he initially presented as severe or moderately serious. That is just about 90% reversal. The one year or greater clients are now likely at least at 80% on average reversal. Utterly remarkable.

## **LUNG CANCER**

I will also tell you that my lungs now are completely free from cancer! Wonderful!

Every night I slept with the straps. Every morning I made juice from apple, carrot, celery, cucumber and ginger. I inhaled colloid silver two to three times a day. I also took dr. Budwig's method with oil of flax-seed mixes in cottage cheese (1 tbs oil and 2 tbs cottage cheese). Every evening I drunk a drink of seed milk, cur cumin and ginger. And not to forgot I drank several glasses of water with lemon every day. So you see I did a lot of different things. And I am convinced that you can heal from cancer if you do the right things.

## **STAPHYLOCOCCUS AUREUS - STENOTROPHOMONAS MALTOPHILA**

My son thanks to the Low Voltage Machine Machine was able to eliminate Staphylococcus aureus and Stenotrophomonas maltophila. Thank you, A.F.

## **EYE FLOATERS**

I used the floaters frequencies for about 2 months.

I thought I was losing my vision - ran to the eye doctor - and it was a bunch of floaters had coagulated in front of my lense. I had a hard time taking photos.

I used the frequencies for 2 months and had to change to teeth problems.

Over the next week, the floaters seem to have disappeared. Isn't that great. S.F.

## **BRAIN CANCER - 4 MONTHS TO LIVE**

If you are looking to expand your testimonial page I can share one. In October of 2015 I was diagnosed with stage 4 brain cancer, glioblastoma multiforme. Had a craniotomy that based on a 2nd opinion, they left the tumor and did not cut it out. The oncologist told me I had about 4 months to live on average. However, I opted out of all conventional medical care. No more surgeries, 0 raditation, 0 chemo, 0 pharmaceutical drugs. I purchased the Low Voltage Machine in 11/15 and used it almost every night by faith. Along with a good diet, proper supplements, exercise and meditation. I am a walking miracle. After those first 12 days in the hospital, I never

missed a day from work. Didn't get sick in 2016. I live an incredible quality of life. T.B.

## **SKIN RASH**

A red rash of unknown origin appeared on my husband's calves. We used our intuition and chose skin diseases, bacterial. My husband did one frequency set during the day, and 4 frequency sets overnight. He felt like something was happening, but in the morning there seemed to be little change. The next morning however, the rash had faded by about a quarter - a noticeable difference. He applied colloidal silver topically, and now a few days later, the rash is gone. My belief is that if we had continued to use the Low Voltage Machine, it would have continued to fade, but he wanted to work on more serious problems with the Low Voltage Machine. Your recommendation was to do 7-14 sets, and in our opinion, the results agreed with this recommendation.

I think doing a detox set with it would also have been good, and he did take a detox herb.

## **ARTHRITIS**

I began with the arthritis comprehensive, for treatment of minor arthritis pain. After 3 weeks, I noticed improvement, but I wanted more pain relief so I could jog. I discovered that I could feel the frequencies and I could intuit which ones were stronger for me. Since then I have combined frequencies from different sets to make my own personalized 10 frequency set. I managed to get rid of virtually 90 % of the pain and could jog with ease.

Here are my conclusions:

Doing the detox sets at the same time allowed me to be pain free when jogging. I was so happy.

A good diet is essential. I overate sugar and wheat, and my symptoms came back again with different pains, and so now I am doing 2 different personalized frequency sets a day for support.

My emotional state significantly affects my discomfort, and I believe that my improvement is much slower as a result of stress. The Low Voltage Machine helps me regain my balance.

The arthritis, degenerative set is the same as the osteoarthritis set, and I found this set helpful.

Don't be put off by how the frequencies are labeled. I used frequencies from the arthritis rheumatoid ,reactive, rheumatic acute, juvenile rheumatic, and specific frequency sets, even though I don't what these conditions are. I believe that some frequencies work better for some people than others, and alternating frequency sets might cover more frequencies that work for the individual. P.C.

## **RUNNY NOSE**

I get a lot of advertising in my mail for various health products. In one of these they were promoting their treatment for sinus conditions. They told of a study made by the Mayo Clinic which showed that there was fungus in the mucus of 96 percent of patients with sinus problems. I often have a runny nose in the morning which usually dries up a little later. I found the frequencies for fungus and used them. In a few days the morning flow from my nose was greatly reduced. I think that I will now use the frequencies for sinus and see if I can clear up the remainder. R.H.

## **AGGRESSIVE BRAIN TUMOR**

I have not told you about C. for a long time. You may remember that she had a serious aggressive brain tumor. She made a "miraculous" recovery using my old machine. (Her doctor thought it was due to the Chemo.) However, they gave her another round of chemo which left her quite weak. I think it was an accumulation of toxins. She was using the detox frequencies. (I am not sure that she needed that last round of chemo, but I am not a doctor.) She seems OK now but is not back to her normal stamina. She is excited that she has found a doctor (at least I think he is a doctor) who believes in the Low Voltage Machine. I only see C. at church and she is so busy flitting around doing various jobs that I have not been able to have a long conversation. I am encouraged by any health care professional who is using the Low Voltage Machine technology. I hope that it does not get him in trouble. R.H.

## **PSORIASIS - LYME DISEASE**

I wanted to share this with you. My husband has been dealing with horrible psoriasis for many years. He was on all kinds of medication, plus injections, for years. After one month on the Low Voltage Machine he is completely free of psoriasis!! The Low Voltage Machine machine has been a true miracle for both of us!! My Lyme is in remission and I'm feeling better each day. I can't tell you how many days I wanted to die. I now have my life back and am so grateful for this miracle. We ordered our second Low Voltage Machine so we could both use a Low Voltage Machine at the same time!! Thank you for being so helpful. I'm sure we will send you a lot of business!! We are living proof IT WORKS!! Sincerely, C

## **DOG KAPOSÍ'S DISEASE**

I have saved my dog from Kaposi's disease - he is cleared of that. Thank you very much.

## **LYMES - CHRONIC FATIGUE - FIBROMYALGIA - BRAIN FOG - EXHAUSTION**

I remember you saying your daughter was helped with Low Voltage Machine Machine. I've been with Lymes/Chronic Fatigue /Fibro ... Worst the Brain Fog & Exhaustion ... Pain I can handle. This machine REALLY did I the trick. I've tried SO many things '93 that it just seems a waste of \$\$\$\$. This one people are saying is the REAL Deal ... Thank you!

## **HIVES**

I had an Uber passenger on Friday who brought up the Low Voltage Machine machine out of the blue. He had been getting treatment for a serious case of hives for years, with no effect. The Low Voltage Machine machine cleared it up and he has had no further problems. He was amazed by how the Low Voltage Machine machine solved his problem after spending a lot of money on medical treatment and getting no relief.

## **SHINGLES**

Also, I think we can add another success story to the Low Voltage Machine. My wife was diagnosed with shingles the day after symptoms occurred. She took a week's worth of a prescription with no guarantee that it would go away or even go away soon. I programmed one setting for the anti-shingles frequencies after which she got hooked up. Within about 10 days, the symptoms disappeared, and she seems healed. Thanks again.

## **LUNG CANCER CURED IN 5 WEEKS**

Have been studying and learning about this technology for 3 decades... My Mother has been using one of your machines for 2 years with incredible result. My sister recently started with another machine and a young realtor (at my suggestion) in his 3rd year of battle with lung cancer... Which cleared his cancer in 5 weeks,,, at least according to full body scan at MD Anderson in Houston, Texas. Incredible!

He attempted to explain his gratitude, but words would not come... All he could do was hug my neck...

## **PINK EYES**

This client contracted "pink eye" and was directed to the Low Voltage Machine conjunctivitis setting.

In less than two days, the condition resolved. Everybody else in the household had it for more than a week.

I have a cochlear implant and have been using mine with no problem my had eye an implant also and uses it without problems.

## **NIGHT SWEATS - MORGELLONS/LYME DISEASE -SCALP ITCH**

Thanks very much for the information in response to my question about development the Low Voltage Machine frequency groups. I have been thinking about the amazing resolution of my problem with

night sweats, and have felt that I should elaborate on this experience by way of a testimonial.

This is a very personal problem, which I had not talked about much. However I did discuss it with several physicians, but nobody had a good answer.

It began with my cardiac bypass surgery in 1999 at the age of 59. Prior to that, I had never had any instances of night sweats. It started out as a minor annoyance and inconvenience. In order to protect the bedding, I began wearing pull-over shirts to bed, and one shirt would absorb all the moisture at night for some years.

However, as the years went by, the condition worsened, and I began having to change shirts during the night. Sometimes the soiled shirt had so much moisture in it that it bled into the sheets, and I would have to either put down a beach towel or move to the other side of the bed.

I tried to find helpful information on-line, but could find nothing of use. The condition continued to worsen until, over the last several years, I was often changing shirts five times a night, and sometimes the shirts were completely soaked. The sweating seemed to be concentrated around my neck and upper torso, It did not affect my arms or legs or lower torso. I just resigned myself to living with it for the remaining years of my life.

About five months ago (May 2015), I discovered the Low Voltage Machine machine for my daughter's Morgellons/Lyme disease problems. I was able to acquire the use of a Low Voltage Machine machine for myself, with the idea of treating unrelated problems with arthritis in my knees, a vision deficiency, gout, and painful bunions in my feet.

Much to my surprise, after several months of Low Voltage Machine machine use, a long-standing problem with persistent scalp itch suddenly disappeared.

I also began to notice a gradual improvement in the night sweats, but at first I did not think it was a permanent change. However, in the last week I have realized that I no longer have even the slightest dampness around the collar of my pullover shirt that I have worn overnight. The night sweat problem has been completely eliminated by the Low Voltage Machine machine!

I don't know what frequencies did the trick. In any case, I am

extremely pleased and grateful for the resolution of this most annoying problem, although it seems trivial compared to the problems associated with Lyme disease and cancer that so many of my friends and relatives are fighting with the Low Voltage Machine machine. DL

## **ARTHRITIS - GOUT - NECK PAIN - SKIN GROWTH (MOLE?) - DENTAL PAIN (ROOT CANAL)**

L. stopped by last night on another matter, and the subject of our mutual success with the Low Voltage Machine machine came up. In my case, I have recently experienced severe arthritic knee pain and gout-caused foot pain which had made walking almost impossible, and which has almost disappeared after using the Low Voltage Machine machine to treat these conditions. In fact, the gout pain in my foot is completely clear, and the residual knee pain is very minor, present only when my knee is in certain positions, and improving every day.

In L's case, he had a longstanding problem with severe neck pain following a mountain bike accident several years ago in which he was thrown over the handlebars after hitting a rock, and suffered severe spine damage. He was consuming "handfuls" of Ibuprofen every day to live with the pain. He got a hold of the Low Voltage Machine machine I had loaned to his wife, who had severe back pain which was resolved by the Low Voltage Machine machine. Larry's neck pain cleared up completely with the Low Voltage Machine treatment, and he no longer needs medication for the neck pain.

Last night L. described two new positive experiences with the Low Voltage Machine machine. The first experience involved a growth on the skin of his upper back. He could not see the growth, but he thought it was a large mole-type growth, and it was causing considerable discomfort from constant itching. After one night using the Low Voltage Machine machine in the SUPER SWEEP mode, he noticed that the texture of the growth changed from firm into a mushy character. Over the course of the next few days, the growth remained soft and mushy, while shrinking in size. It has now disappeared completely, as has the itching.

L's second experience involved dental pain from a tooth with an old

root canal. Larry used the Low Voltage Machine machine "ROOT CANAL" group (which I discovered is identical to the "DENTAL BACTERIA" group) in an effort to treat what was probably an infection on the tip of the root canal. After several nights of Low Voltage Machine machine use, the dental/root canal pain has completely cleared up.

## **ARTHRITIS -TOOTH PAIN**

The Low Voltage Machine machine has almost completely resolved severe arthritis pain in my left knee and a severe gout attack in my left foot. A month ago I could barely move on my feet.

Then this weekend a tooth with an infected root started acting up, and I was getting severe pain. After thirty minutes using the dental group of frequencies on the Low Voltage Machine machine, the pain receded. By the time I arrived at the memorial service for a friend who had passed away, the pain was gone, and the tooth is completely free of pain or soreness this morning.

The Low Voltage Machine machine is better than having your own pharmacy and a doctor on call! D.L.

## **ARTHRITIS**

After another night of deep sleep on the Low Voltage Machine machine, I am almost completely free of the arthritis pain in my left knee, and the gout pain in my left foot. I can walk normally and climb stairs today with almost no pain (only the slightest pain in my knee). D.

## **BACK AND HIP PAINS - NECK SHOULDER HIP KNEE ANKLE PAINS**

About a month ago (in August 2015) my wife borrowed the professional version of the Low Voltage Machine machine from a friend of ours because she was having serious back and hip pain. She tried it and felt that it was giving her some help. I, on the other hand, was very suspicious that this type of equipment could actually do any real good for your health. After about two weeks she seemed to have a significant amount of improvement and, since our friend

also has a daughter who seemed to have some very positive results from using the machine for her ailments (Morgellons/ Lyme Disease), I thought I'd go ahead and give it a try for my neck, shoulder, hip, knee and ankle pain.

By way of background I should explain that I've had a serious mountain bike accident and fractured all of the vertebrae in my back. It also completely smashed my vertebrae C4, which was removed at the trauma center and reconstructed from some of my own bone and replaced and held in place with four screws and a metal plate. That was back in 2010. Since then I've had about six months of therapy to get my neck back into shape and also there's been residual soreness, stiffness and, on a bad day, a lot of extra pain.

Additionally, about 10 years ago I was diagnosed with a tear in my knee, the meniscus was torn. I was scheduled for surgery but at the very last minute decided against that and started using some natural types of remedies and exercise to try and overcome the pain that comes on a periodic basis. I did start riding bicycles again after the 2010 accident (after being cleared by my physician who said that my neck and back had healed to be as strong as it ever was), even though I still had some residual pain and stiffness and limited side to side motion in my neck. After most bike rides I generally would feel somewhat better, although the soreness often required me to take about 600 mg of ibuprofen to calm down the swelling and ease the soreness and limited pain. After a while I found myself needing to take 600 mg of ibuprofen in the morning and in the evening to get through the day and night.

So I decided to try the Low Voltage Machine machine and see if it had any effect at all.

I noticed a distinct change in the level of soreness and lowering of the amount of pain in my neck, shoulder, hip, knee, leg and ankle. This allowed me to sleep that night without having to take any ibuprofen. That was most encouraging.

So the next day I repeated the same type of session for about 20 minutes. Again following the session there was additional reduction of pain and stress in my neck and shoulder to the point where I rated on a scale of 1 to 10 as a one, almost negligible. There was also a similar effect on my hip, leg, knee, and ankle. This is simply amazing

to me and a most welcome change. For two weeks now I have not taken any ibuprofen! The pain and stress in my neck, back and leg is mostly gone, and is more easily manageable with stretching and relaxation. I used the Low Voltage Machine machine only twice a week for about 20 minutes each time and the relief is continuing. Based on this experience, along with what my wife experienced we have just purchased the professional model of the Low Voltage Machine machine. We plan to continue to use it as needed for what we have already started. Additionally we both have several other ailments which we plan to try some sessions and frequencies.

## **TOOTHACHE (ROOT CANAL)**

Recently (Sept 2015) I started having a toothache in a molar tooth. It started gradually over a few weeks as I noticed that hot and cold or chewing pressure on that tooth caused considerable pain, but in general it was tolerable. Since I have had a number of root canals on several other teeth it seemed a clear indicator that this condition would eventually lead to another root canal.

Several weeks went by and I started to wake up at night with increasing tooth pain which I ignored until the third night when I woke up with unbearable pain. So I started to do as I had always done for tooth pain; take 600mg of ibuprofen. As I got out of bed I noticed my Low Voltage Machine machine and the thought occurred to me, being the skeptic I am, that using it at the moment would be a convincing test of how effective it might possibly be. I looked in the frequency listing and to my surprise it had one called 'Root Canal (Bacteria treatment)'.

So I reprogrammed the Low Voltage Machine Professional on Pulse Sweep and laid down in bed. After about 20 minutes I drifted off to sleep, then woke up again after a total of 1 hour on the machine. Much to my surprise and delight the tooth pain was reduced to a minimal level so I turned off the machine and continued with a full night of sleep.

The next day upon awaking I notice that the tooth was not near as sensitive to heat / cold or pressure but still gave me some low level discomfort. Later in the day I did another Pulse Sweep session for about 30 minutes. Now, about 2 weeks later, I still have no pain or

discomfort in that tooth and if it comes back I'll certainly use the Low Voltage Machine machine again as it was immediately effective with lasting results.

San Diego, CA
